# ABOUT US

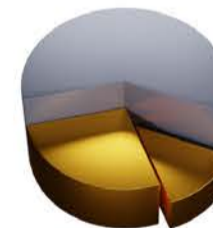

Mission – Development and practical application of Artificial Intelligence technology in healthcare and industrial safety issues

We manufacture and develop our own Hardware and Software in the field of healthcare, industrial medicine and labor protection

We have prevented more than 5,000 Potential cases of sudden deterioration of health in the workplace

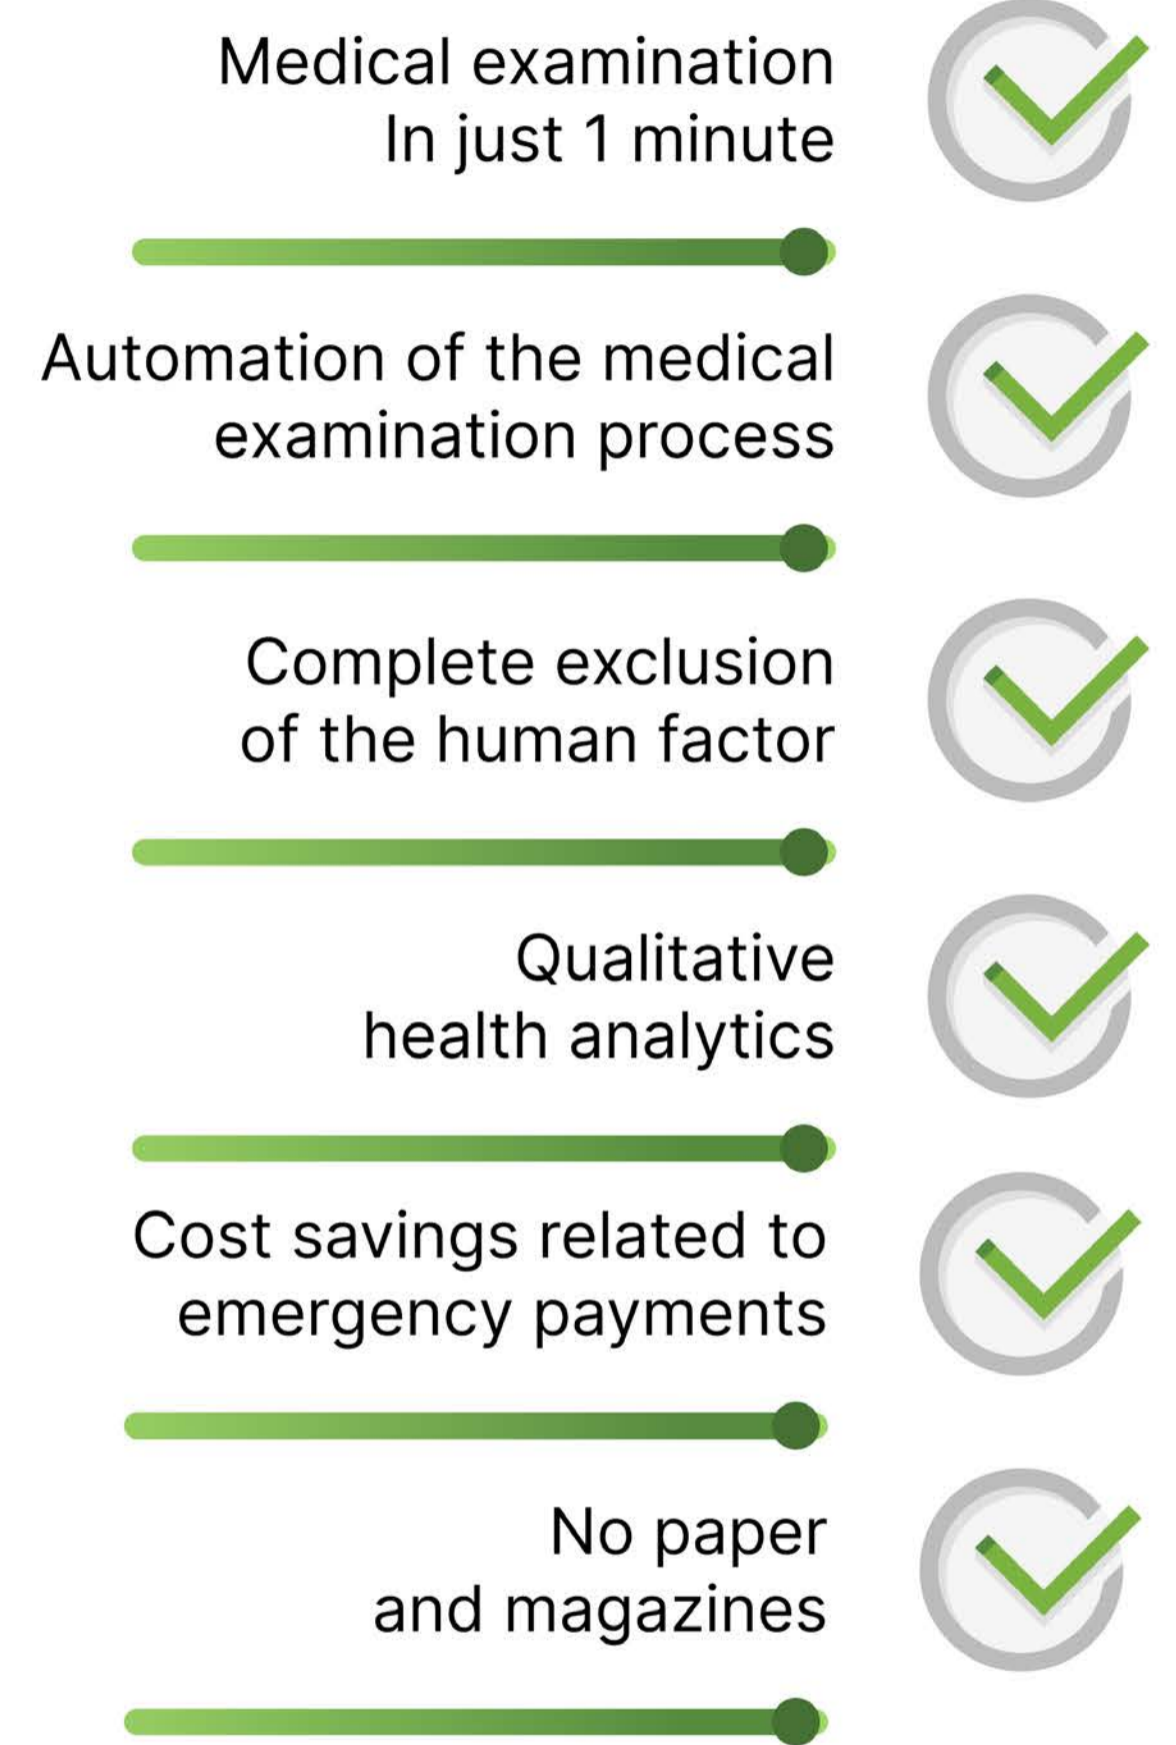

We have found a way to reduce the occurrence of disabled staff members and are already using it in large manufacturing companies in our country

We have saved more than \$250 000 on payments caused by injuries of employees as a result of an accident at work

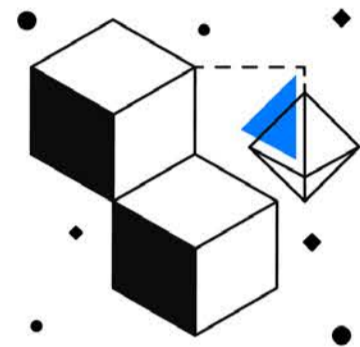

# PROBLEM | SOLUTION

## LABOR CODE

- In accordance with the Labor Code, employees engaged in work involving increased danger, machinery and mechanisms must undergo pre-shift and post-shift medical examination.

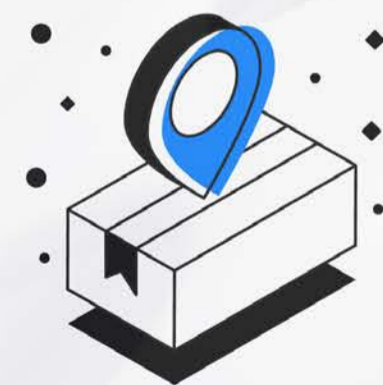

# ABOUT THE PRODUCT

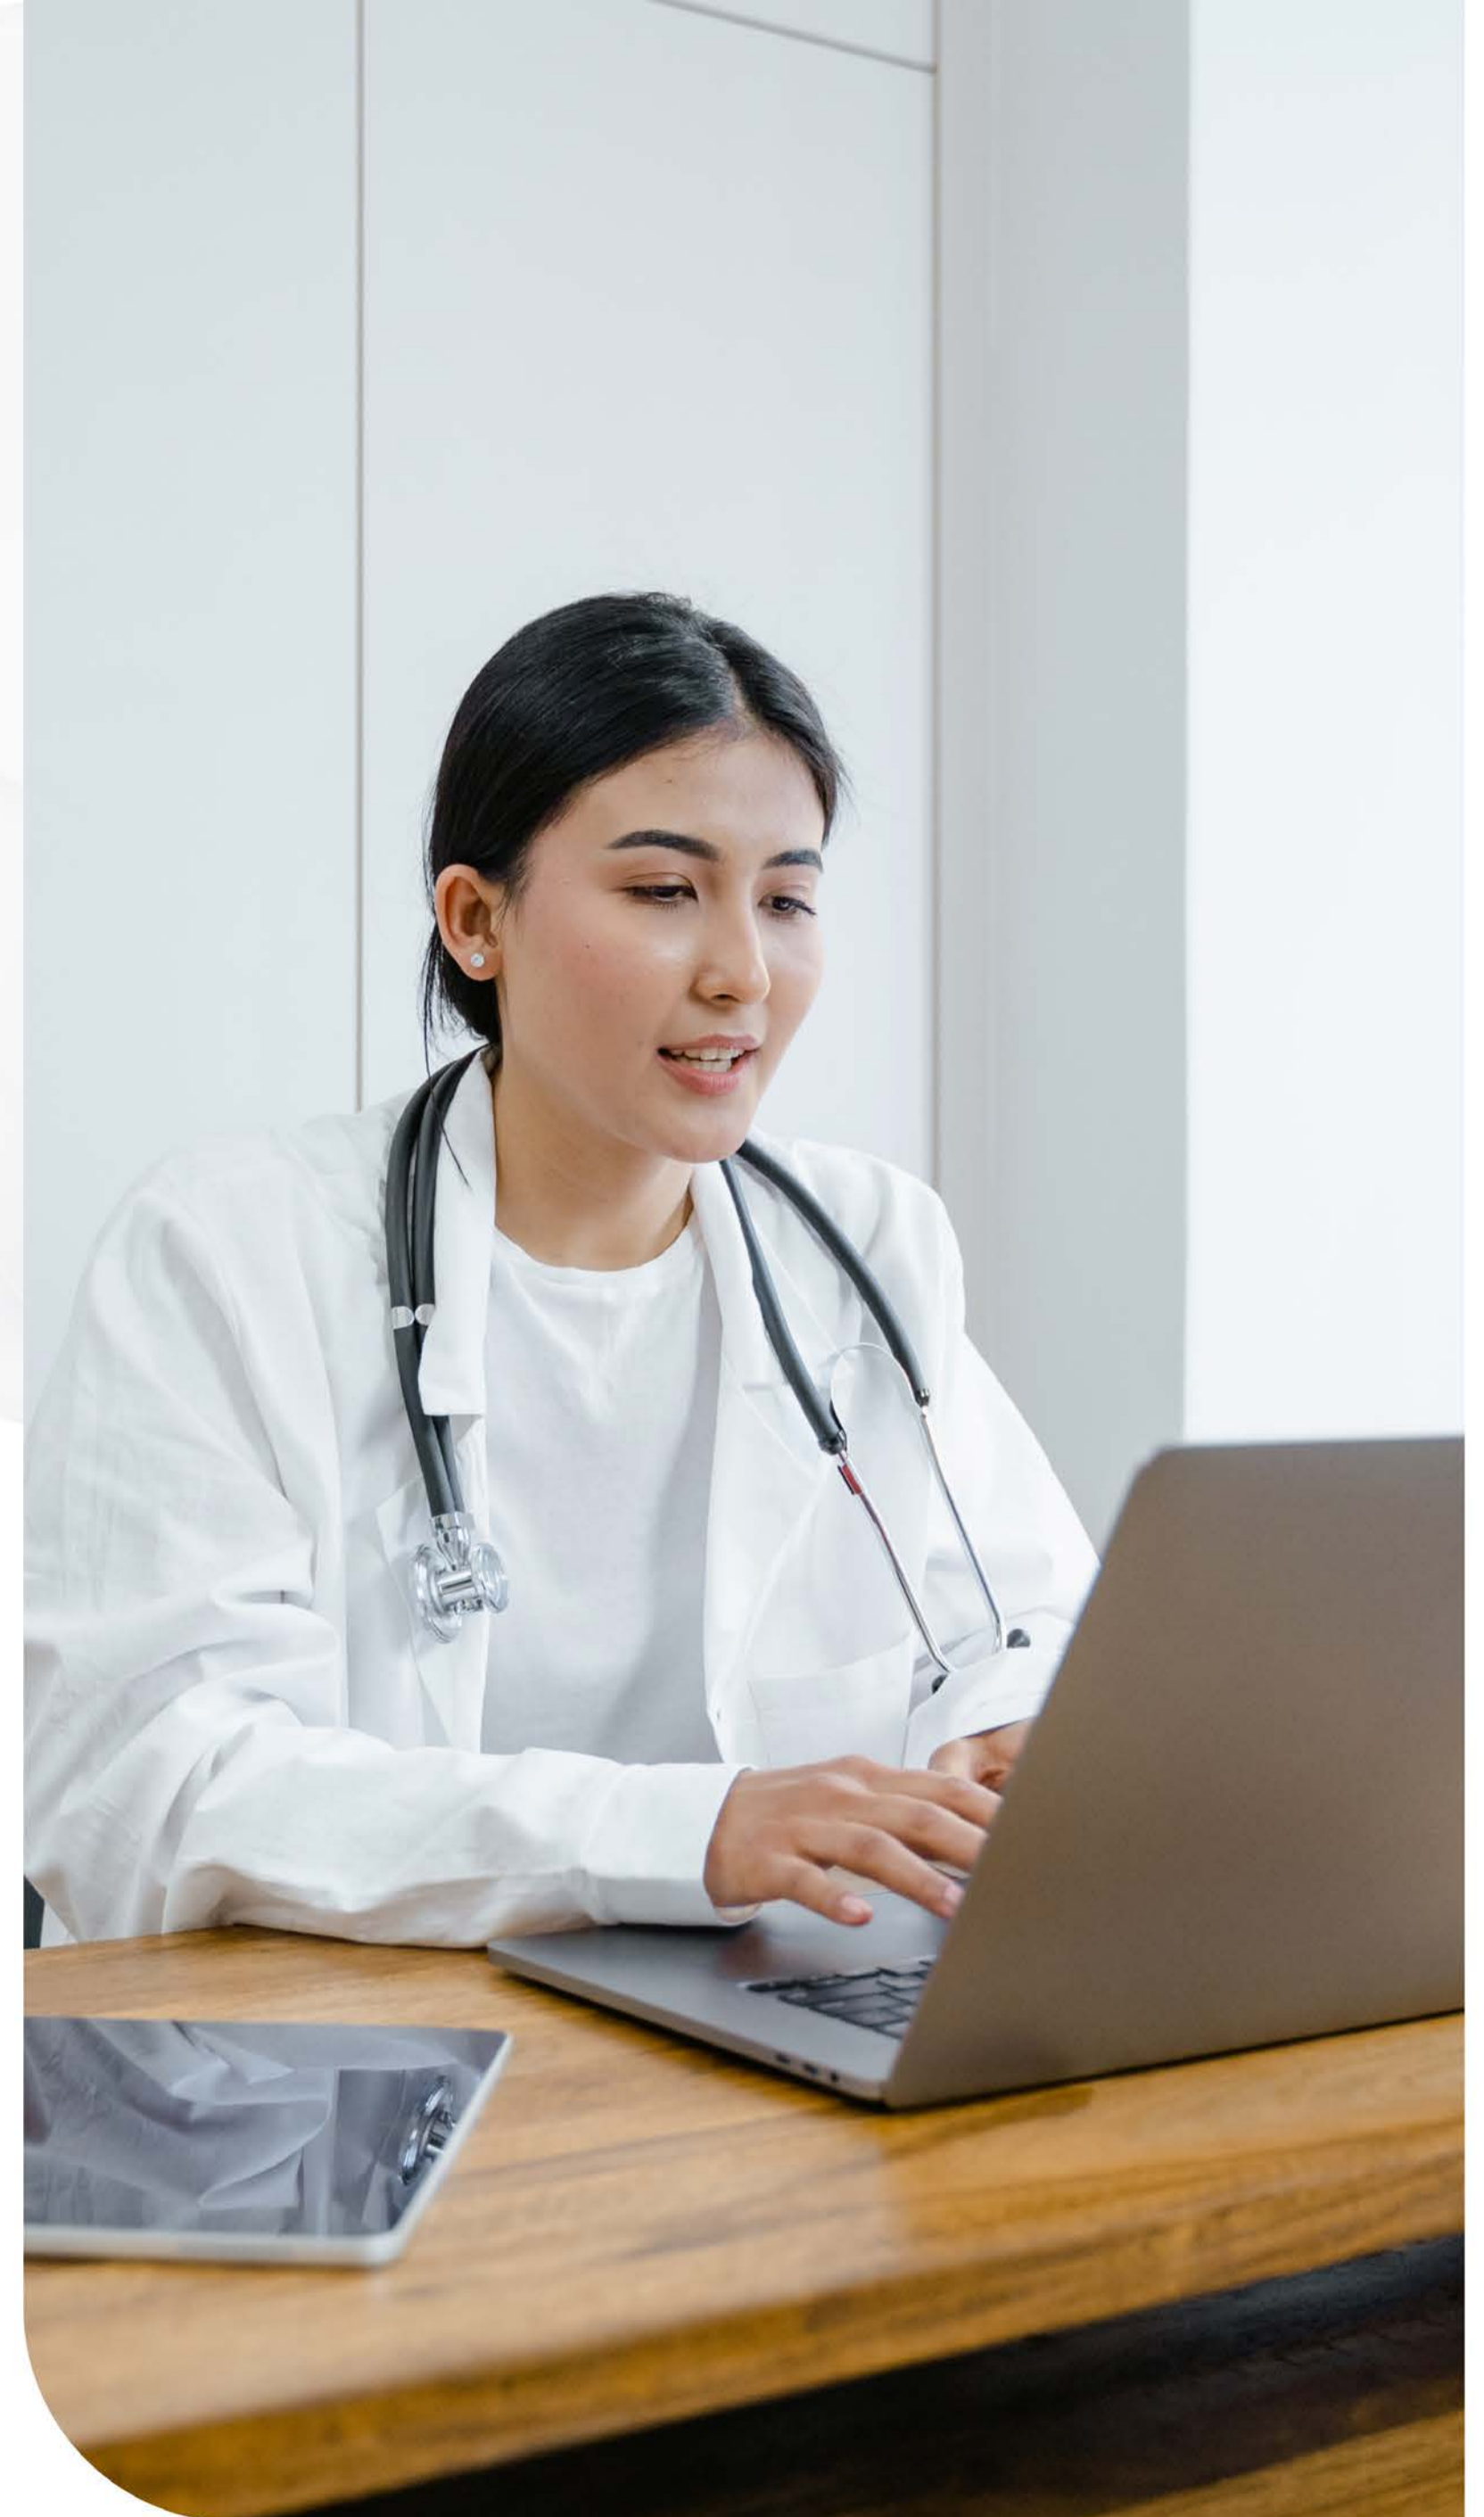

it is included in the register of the trusted software and electronic industry products

The project is aimed at uniting the efforts of the parties on best practices and the implementation of preventive measures that can significantly reduce occupational injuries and reduce the number of accidents

The claimed product has a certificate of origin of the form CT-KZ and an Industrial certificate issued by the Chamber of Entrepreneurs

# BASIC FUNCTIONALITY

The possibility of choice  
system language  
(Kazakh / Russian)

Employee  
identification by  
Face ID and RF ID

Test for changing  
the pupil's reaction to a  
light stimulus

Alcohol  
intoxication  
test

Body  
temperature  
measurement

Measurement  
of blood  
pressure and pulse

Questionnaire  
for  
complaints

Printout  
of admission  
coupons

Accounting  
of working  
hours

Photo and video fixation  
the entire medical  
examination process

Integration with  
the customer's  
information systems

Medical  
examination  
in 1 minute

# MODEL RANGE

**ASME MINI +**

15 HD display  
MedShift (PMO module)  
Portable plastic housing  
RF ID / Face ID  
Photo / Video fixation  
External UPS  
+ Drug test

**ASME CLASSIC**

15 HD display  
MedShift (PMO module)  
Collapsible vandal-proof housing  
Anatomical chair  
Thermal Printer  
RF ID / Face ID  
Photo / Video fixation  
Built-in UPS

**ASME MINI**

15 HD display  
MedShift (PMO module)  
Portable plastic housing  
RF ID / Face ID  
Photo / Video fixation  
External UPS

# MEDSHIFT

A medical information system that combines pre-shift medical examination modules and document management automation modules, electronic medical records about patients, research data in digital form, patient health monitoring data, financial and administrative information.

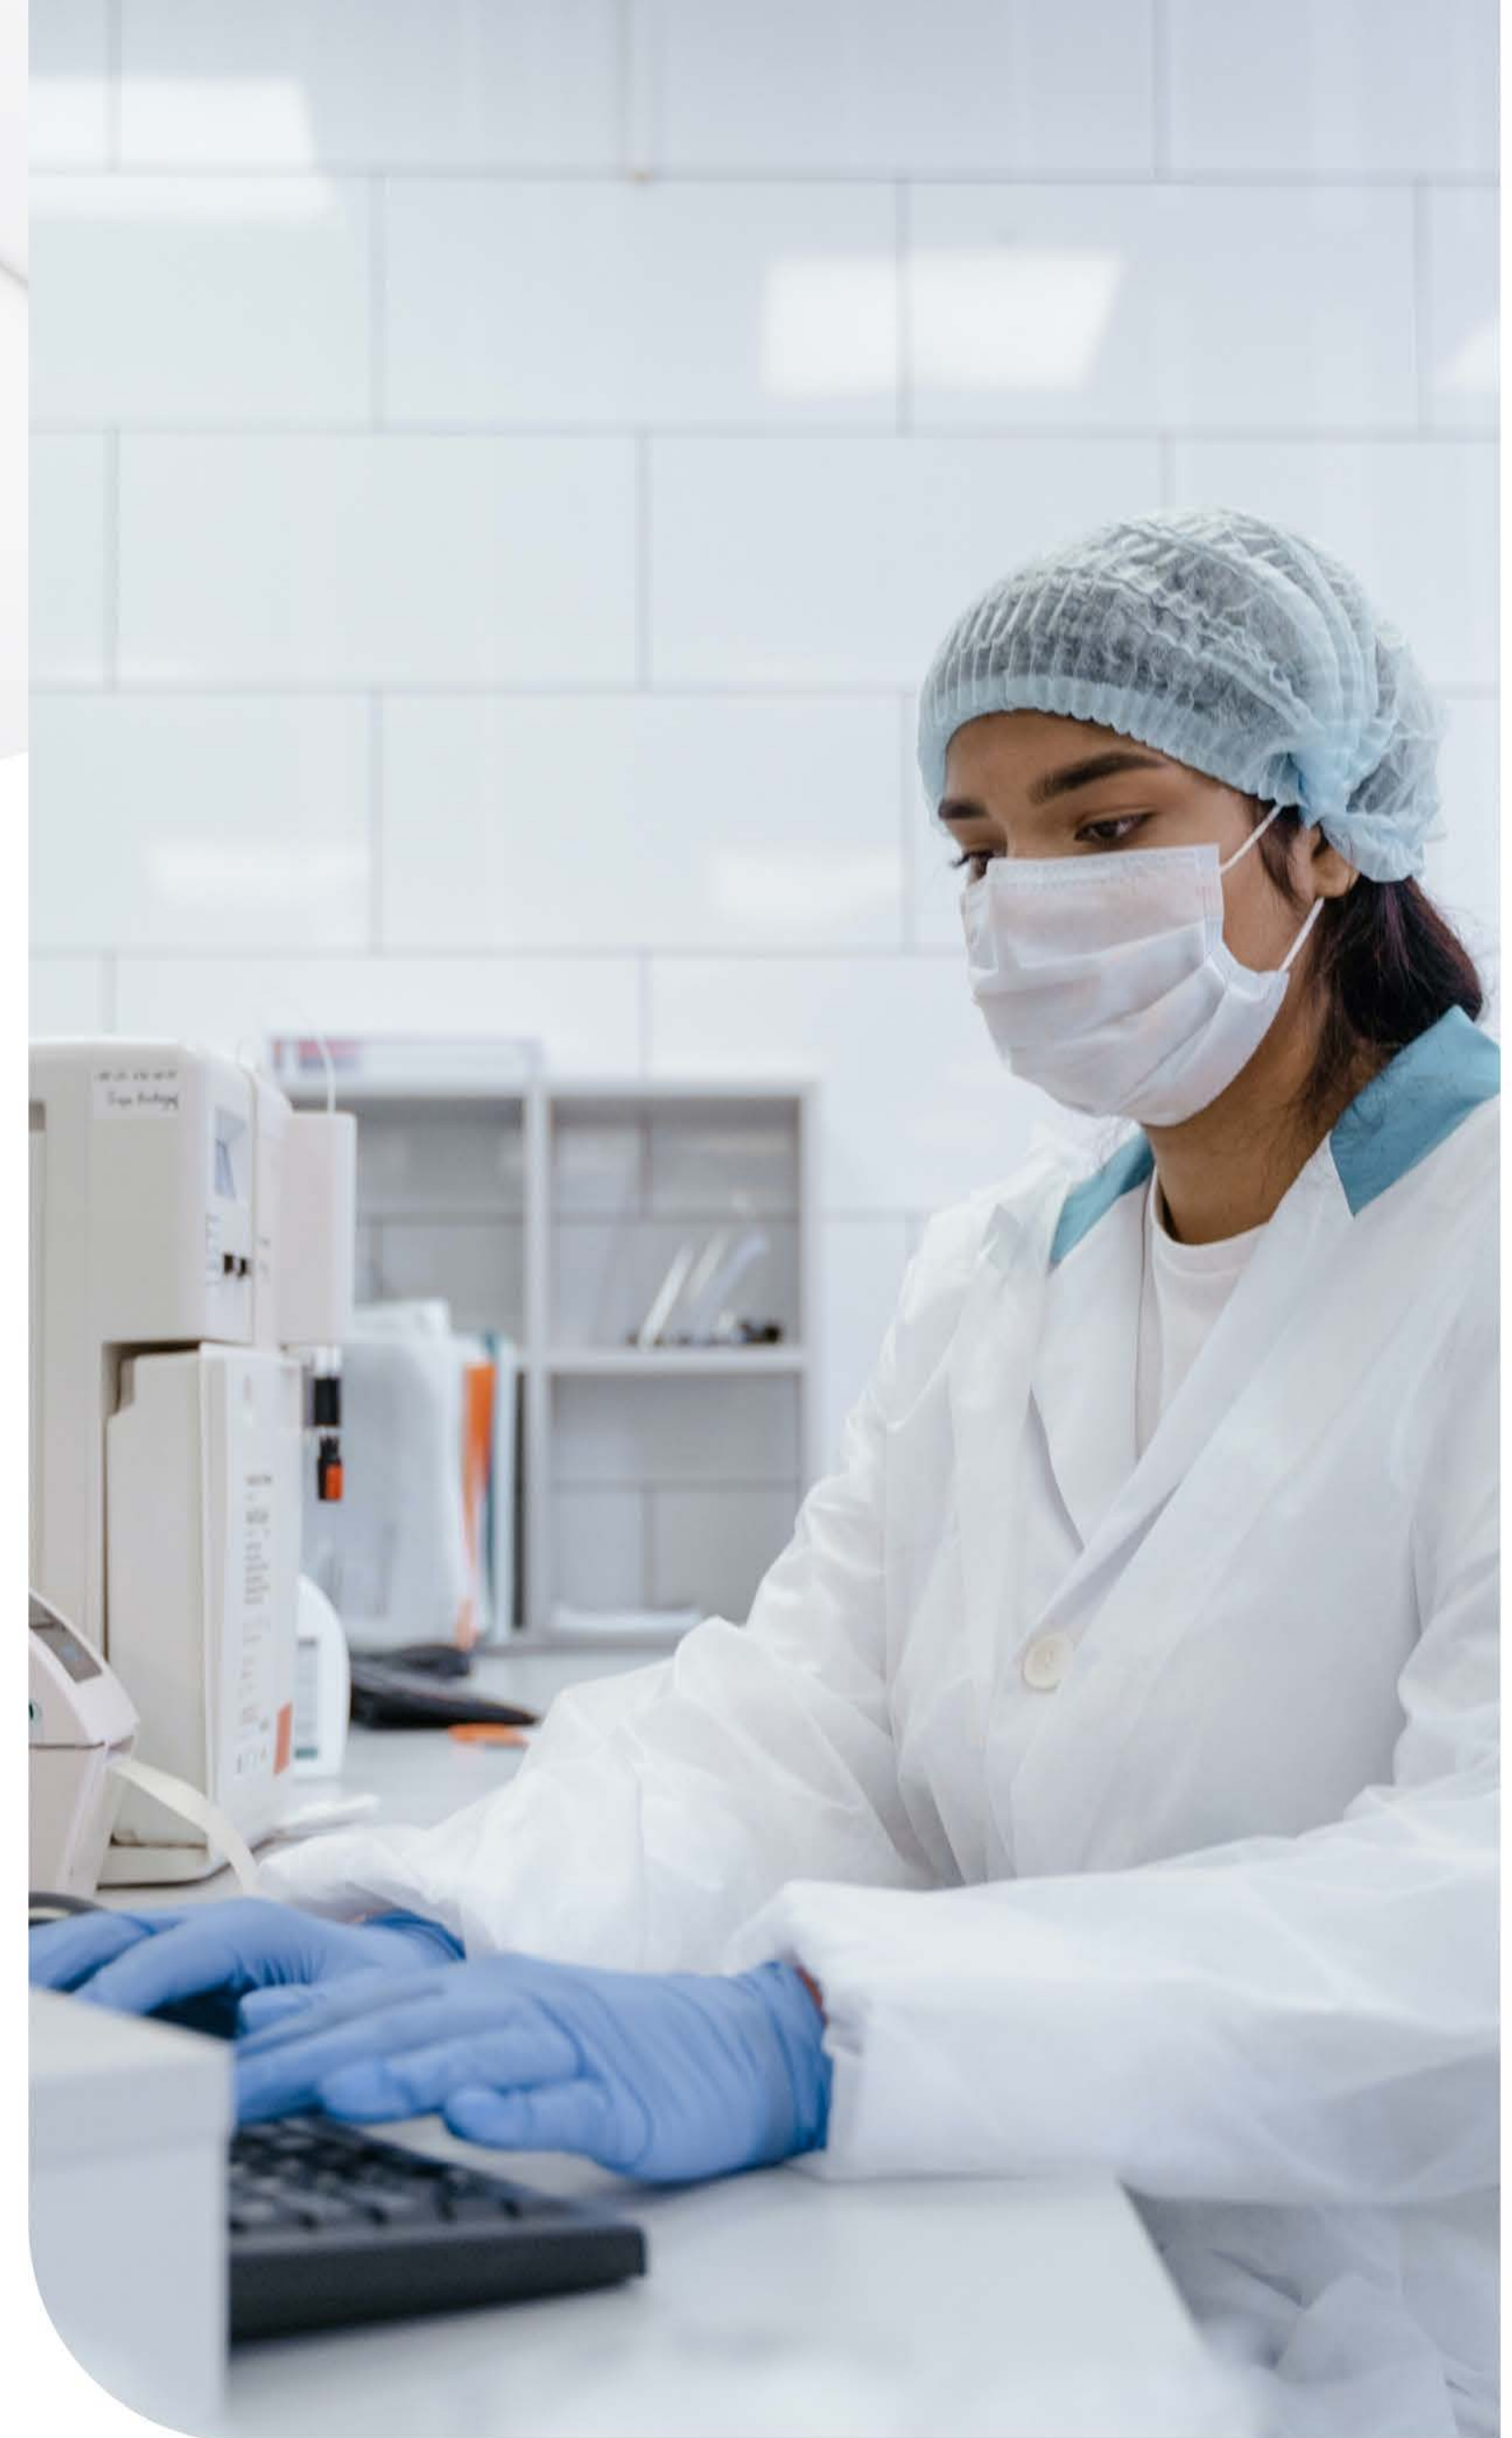

Formation of risk groups for cardiovascular diseases among employees and development of an effective health protection program

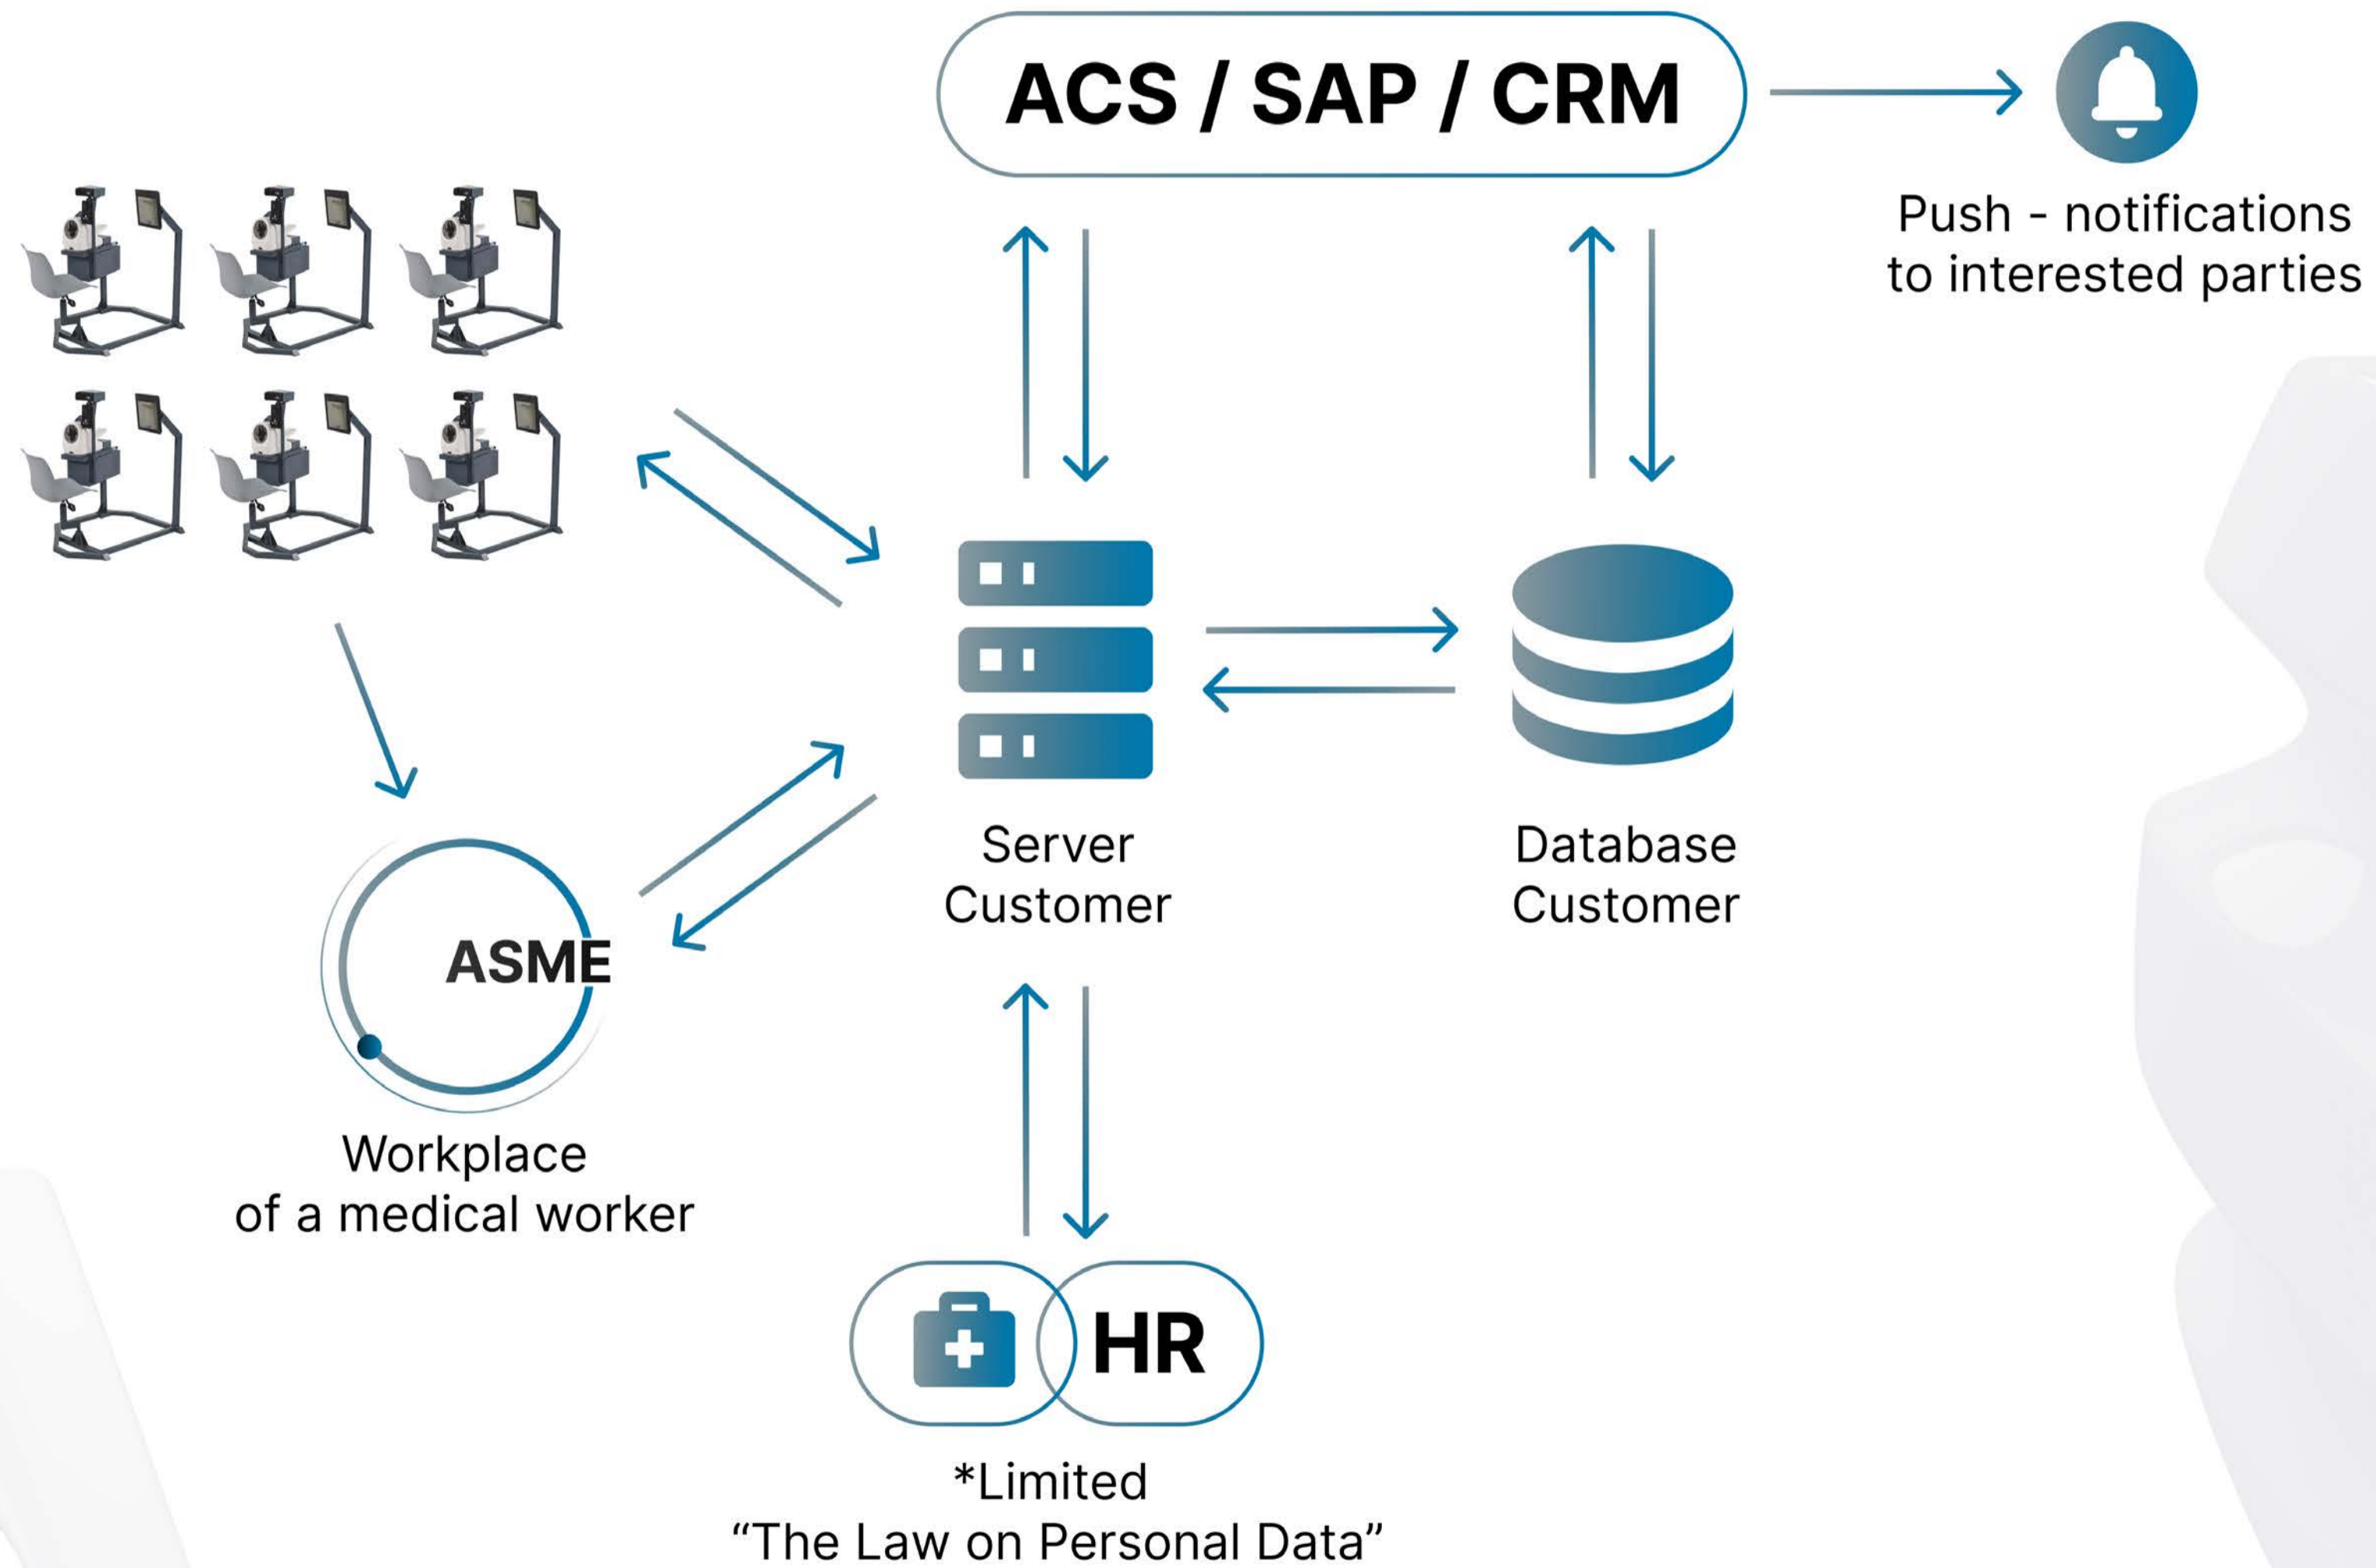

Ability to configure notifications to all interested parties

Monitoring of the treatment process of employees, control of prescribed medications and medical procedures

# CRM INTEGRATION

# LEGITIMACY

According to the requirements of the Code "On the Health of the people and the healthcare System" and the Law "On Permits and Notifications" Med365 LLP has received a pharmaceutical license for the following subspecies of activity:

## **Manufacture of medical devices Production of medical devices**

The claimed product of Med365 LLP - ASME has passed state registration and is allowed for use in medical practice in the territory of the Republic of Kazakhstan, as evidenced by the registration certificate: RK-MI (MT)-022539 dated 07.07.2021

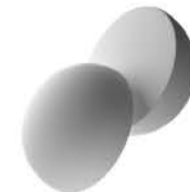

Also, our electronic magazine fully complies with Order 131 of the Ministry of Health of October 15 , 2020

# SERVICE

Polite, qualified and experienced specialists ready to help at any time

Our clients get a solution to their problems quickly and with no delays

High quality customer service

Automated request processing systems to speed up the customer service process

Focus on the needs of customers and the desire to satisfy the requests in full

The ASMO project "Med365" is a vivid example of promoting the concept of zero injury "Vision Zero".

The project is aimed at uniting the efforts of the parties on best practices and the implementation of preventive measures that can significantly reduce occupational injuries and reduce the number of accidents.

Development is a strategic direction within the framework of the State Program "Saudi Vision 2030"

# CUSTOMERS

# PARTNERS

# THE SOLUTION OF OUR PARTNERS

## Smart home. Safety and Comfort

### **SAFETY**

The motion sensor detects movement and activates the lighting in the house (when installing the script). The maximum detection range is at least 18 meters. The speed range is from 0.3 to 3 m/s.

### **DOOR OPENING SENSOR**

It is necessary to track the opening of the entrance door, which will help to recognize entry into the house in the absence of the owner. You can also view the history of opening and closing the door in the Connected Home app.

### **WATER LEAKAGE PROTECTION**

Leak sensors will be installed under the sink in the kitchen and in the bathroom. In case of a leak from the pipes, the user will receive a notification about the leak. When installing a special valve, the water is blocked automatically after liquid hits the sensor.

## Automation of your parking based on number recognition

### **RECOGNITION 99.6%**

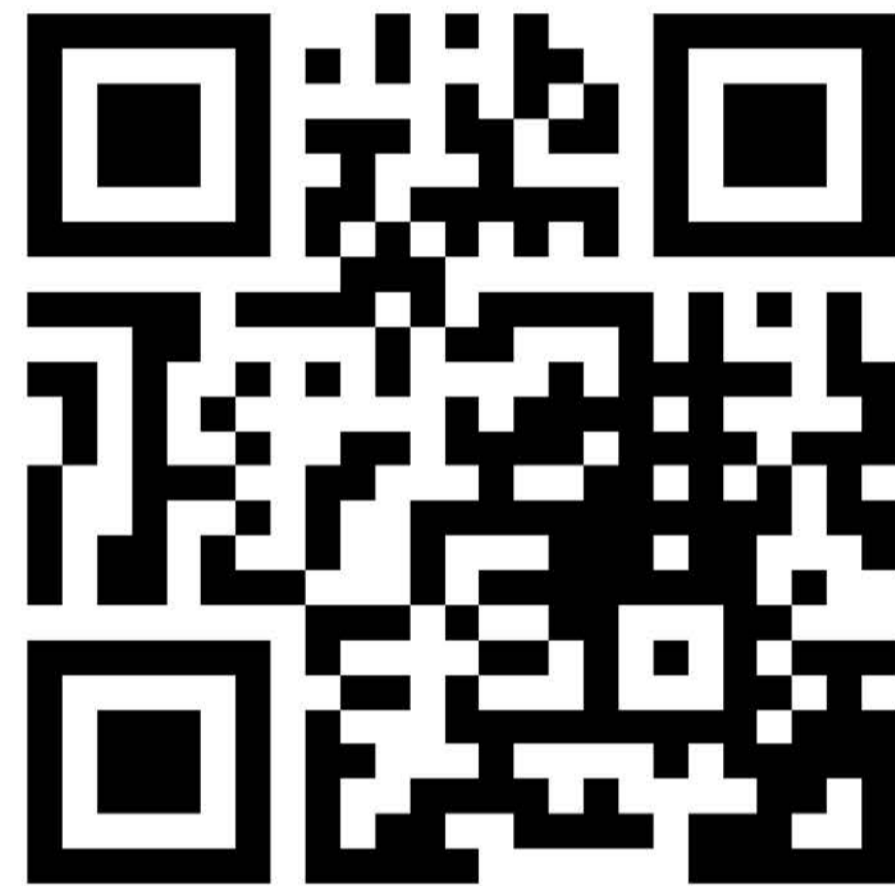

The average recognition in the market is 75%, which is why other manufacturers insist on coupons and cards, because the number of unrecognized cars without coupons implies the presence of an operator at each barrier. parqour recognizes any numbers: angled, blurred and highlighted.

### **DYNAMIC PRICING**

The price will rise and fall depending on the time of day, occupancy and other factors. this will optimize the parking space and increase the profit from parking.

### **PARKING ZONING**

Parqour can set prices for individual vip seats more expensive than in the entire parking lot.

**We create healthy habits**
